Universitas BSI (BSI University)

Bachelor of Science in Information Technology (BSIT)

Recipient of a Fully Funded Scholarship

2021 - 2024

SMKS Bina Nasional Informatika (High School)

Network And Computer Engineering

HIGHLIGHT PROJECT

January 2024

Si-Pintar BNI (Exam Application)

I contributed to the development of a school examination application using Next.js and React Native. This project aimed to facilitate online exams for students, providing a seamless and secure experience across web and mobile platforms. By leveraging Next.js, I ensured optimal performance and SEO-friendly features for the web application, utilizing server-side rendering (SSR) and static site generation (SSG). For the mobile application, I employed React Native to deliver a consistent cross-platform experience Android users.

Feb 2023 – June 2023

Gobot.id

Gobot is a bot service aimed at SME traders to serve customers. I am a part of this project, specifically as the Front End developer using Next JS. In this project, I utilize Material UI and Tailwind CSS for styling. I also create interactive UI by fetching data from the database and adhering to the provided UI/UX Engineer's design. Additionally, I implement an authentication system for users. There are also many complex JavaScript logic components utilized in this project.
